

A consistent height measurement in four steps.

Use the same setup each time. Keep the record. Follow the trend.

☐

Hard floor. Vertical wall.

Use the same location. Avoid carpet and thick baseboards.

☐

Shoes off. Heels flat.

Stand straight and relaxed. Keep both feet stable.

☐

Eyes level. Chin relaxed.

Face forward. Keep the head in a neutral position.

☐

Same general time. Date recorded.

Write the result immediately. Keep the unit consistent.

Bring the record to a pediatric clinician when needed.

A repeated downward crossing of percentile lines, slow growth, or other symptoms can justify an evaluation.
